

## #Lannett Antivirus Verification Form

### Overview

All Consultants requiring access to the Lannett Company network are required to download the latest antivirus definition associated with their computing device within 48 hours of their intended time to connect to the network and in addition, must perform a full system scan after downloading the virus definition. In the event there are any issues arising from the scan that are not able to be remediated, the Consultant's computing device will not be allowed to connect to the Lannett network.

I, SILPIKA MUKHERJEE with COGNIZANT TECHNOLOGY SOLUTIONS

verify that I have downloaded the most recent virus definition for the applicable antivirus software installed on my computing device and have performed a full system scan within the last 48 hours. I also verify that as a result of this scan, there were no known issues that were presented.
